

Photo Booth Risk Assessment

Part2 update 2021 (Covid)

Hazard Area	Risk	Existing Controls	Likelihood 1-5 See Below ^	Severity 1-5	Risk Score L x S	Any Further Action
Covid Conciderations Booth Barriers.	Contamination Transfer. Potential Virus transfer Via. Booth Equipment and Process.	Clean Surface areas prior and during running of Booth. Provide and encourage hand sterilisation with provided sanitiser/s. Booth capacity to run at current recommended guidelines; taking into account "Pod" Grouping Factors.	1^	3^	3	Touch Screen operation of Booth to be under control of Operator to minimise physical contact of surfaces Or Screen cleaned prior to next client.
Covid Conciderations Props/Book Tables.	Contamination Transfer. Potential Virus transfer Via. Booth Props and Photo Media	Props. Where agreed will be classified as Type1 or Type2 and handled as per. below* description. Photo Media. Will be preloaded printed and dispatched directly into hopper for clients to retrieve with minimum operator interaction.	2^	3^	6	See Below for special prop. "Handling"

Type1 Prop

Defined as easily cleaned, substantially impervious "hard" surfaced. This Prop can be sterilised and returned to the Prop Table during Photo-Booth sessions by Booth assistant.

Type2 Prop

Defined as impractical to treat during Photo-Booth Session and will require more extensive treatment. This is a "one-time-use" prop for the Photo-Booth Session and will be recovered **after ONE USE** by Booth assistant.

^ Factor considered, taking into account, client base has initially undergone initial screening to reduce any presence of virus within Booth Clients.
